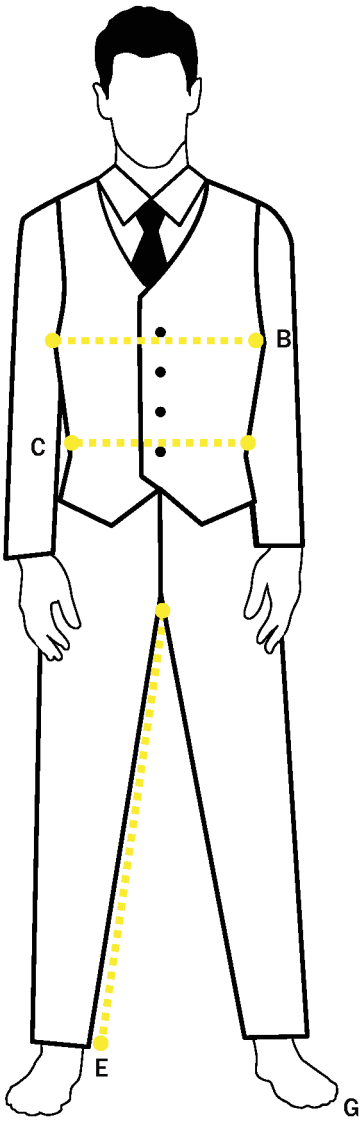
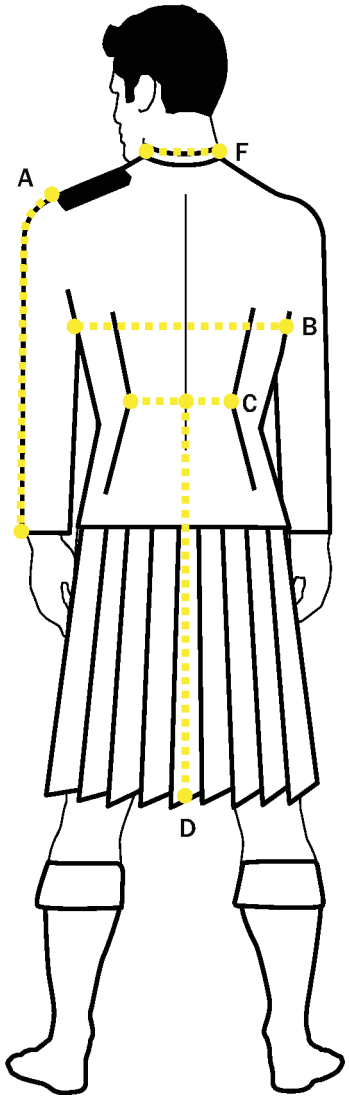
MEASURING GUIDE





A. Crown to cuff

Measure from crown to cuff (shoulder to wrist). It is also helpful if you can measure with the arm bent at the elbow in front of the chest and measure again shoulder to wrist.

B. Chest size

Measure around broadest part of chest keeping the tape up under the arms. Keep one finger between the tape and the body.

C. Waist size

For a kilt, measure 2 inches above the hip, level with the gent's navel. For trousers measure 1 inch above the hip bone. Men tend to breathe in when getting measured so ensure they are relaxed and breathing out.

D. Kilt length

Ask the man to kneel down with his back and thighs vertical.

E. Inside leg

Measure crotch to ankle or normal position man wears his trousers.

F. Collar size

Measure front of neck all the way round to meet 1st point again.

G. Shoe size

With your chest measurement and crown to cuff measurement, use the chart to calculate you fitting.

Chest Measurement
